

EUKOR Car Carriers Inc.

We deliver

WE DELIVER

A global leader in
ocean transportation

A note from the CEO

OUR NETWORK OF TRUST

Craig Jasienski
President and CEO
EUKOR Car Carriers Inc.

A handwritten signature in white ink, appearing to read 'Craig Jasienski', positioned below the printed name and title.

As an industry leader, EUKOR continuously strives for excellence. Our solid experience in the market coupled with our unique background allows us to better navigate the industry, resulting in the optimum transportation solutions for our clients. We are quick to notice and respond to changing customers' needs – which is why we are entrusted with cargo from the world's leading manufacturers.

As a company that values partnerships, EUKOR is committed. We don't ask for trust; we deliver trust. Our competitive services and long-term client relationships prove that we are reliable. We constantly push to develop our fleet and services, always with the mindset of providing quality, including

short lead times and damage-free handling. We treat every stage of our service provision with care and attention to ensure that we are not only delivering our customers' cargo – but also earning their trust.

Domestic or global, EUKOR acts with the same integrity and reliability. Packaged together with the local convenience of our offices, it means our worldwide customers are always in safe hands – no matter where they are based.

Our proficiency as an industry leader and trusted partner guarantees our customers that being onboard with EUKOR Car Carriers is an experience that is second to none.

WE DELIVER

EUKOR is a global shipping company that specialises in port-to-port deep-sea transportation of cars, rolling and static cargo. Our ambition is to deliver the optimum transportation experience to our customers in a consistent, reliable way – over and over again. Simply put – WE DELIVER.

UNITY

A FULLY HARMONISED GLOBAL COMPANY, WORKING TOGETHER ACROSS MULTIPLE LOCATIONS AROUND THE WORLD.

Our fleet of more than 80 specialised Pure Car and Truck Carriers (PCTC) operates on a multitude of trade routes spanning the globe, annually transporting in excess of 4 million Car Equivalent Units (CEU). EUKOR's global network consists of regional offices, strategic partnerships and alliances with trusted associates. Together with our sister company, Wallenius Wilhelmsen Logistics, our operations form the largest network of its kind. That gives us the confidence to promise our customers the best transportation solution.

INTEGRITY

WE RUN OUR BUSINESS IN A RESPONSIBLE AND TRUSTWORTHY WAY. WE ARE COMMITTED, DEDICATED, SAFE AND RELIABLE.

EUKOR's unique trading routes ensure a balance between efficient operations for cost-effectiveness and quality service for customer satisfaction.

We combine the best of what Korea and Europe have to offer. Having the Hyundai Motor Company and Kia Motors as shareholders (20%) gives us a unique platform and insight into the value-drivers of our industry. Add that to our shareholders from Norwegian shipping company Wilh. Wilhelmsen (40%), which has shipping experience dating back to 1861, and leading Swedish shipping group Wallenius Lines (40%), a pioneer in car-carrier operations since 1934, and we have created a company with world-class competency.

AGILITY

COMPETITIVE, WITH A CAN-DO ATTITUDE, WE CONSTANTLY RESPOND TO THE CHANGING NEEDS OF OUR MARKET, WHILST ALWAYS MAINTAINING OUR STANDARDS.

We actively develop better and more creative transportation solutions to remain the industry leader in operational excellence. Pushing industry standards forward, such as ensuring on-time delivery, providing faster feedback and focusing on safety, is embedded in the EUKOR way of thinking.

Our vast trading network also makes room for flexibility, allowing us to quickly respond and adapt to any customer requirement. You should expect us to be responsive, flexible, prompt, clever and persevering.

AN UNBEATABLE SERVICE

EUKOR boasts decades-long experience when it comes to our service provision. Our main field of expertise lies in port-to-port shipping of finished vehicles – primarily cars, trucks and buses, as well as self-propelled agricultural and construction equipment. However, we are not limited to self-moving units; across our extensive network of trade routes, EUKOR also transports huge quantities of cargo that require specialist handling equipment and know-how on a daily basis. Unitised cargo such as power generators, railcars, yachts and wind turbines – just to mention a few – are quickly and easily accommodated on our ships when put on specialised roll trailers.

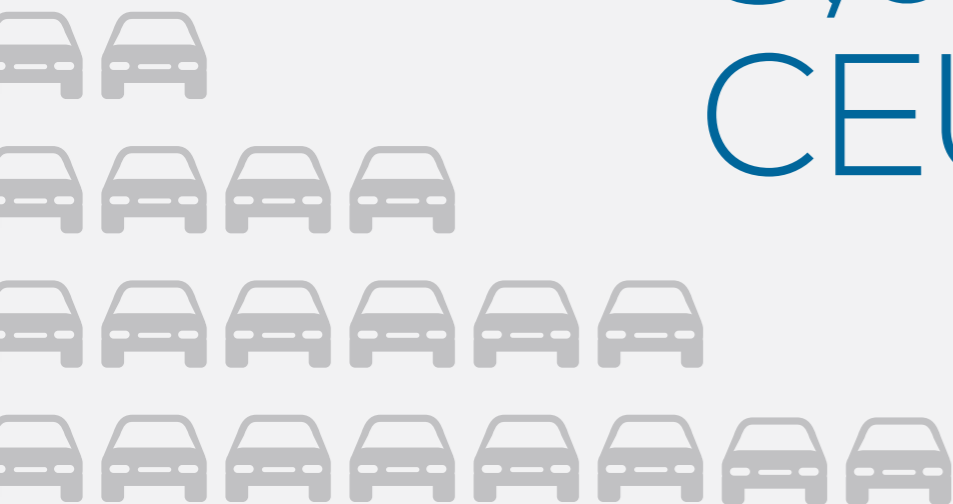

Loading bulky, heavy cargoes – on wheels or not – is of course only possible when the ships have the required set-up. EUKOR's large and modern fleet of vessels is capable of accommodating a variety of different cargo types. Couple that with our strong team of industry experts and you have an unbeatable service in optimising safe and efficient transport for any cargo type.

AN INDUSTRY-LEADING FLEET

2,000-
8,000
CEU capacity on
our ships

Our PCTC fleet is best described as efficient. From light vehicles, to heavy and bulky cargoes, our ships can meet a wide variety of requirements. With capacity between 2,000 and 8,000 CEU's, and typically four lifttable decks, our ships are easily adaptable to the needs of one trade to another.

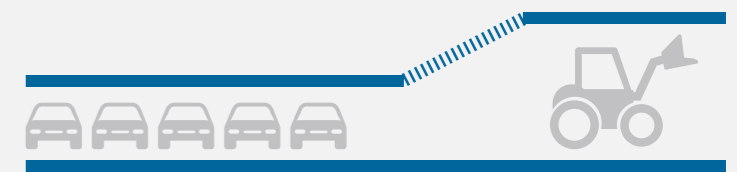

Our fleet is **BIG**

Perhaps more prominently, our fleet is big – both in number of ships and the average capacity per ship. The middle-sized ship – the ‘workhorse’ – has a 6,000 CEU capacity and a proven track record in terms of efficiency. These vessels are truly versatile and can operate on any of our trade routes. Our 8,000 CEU ships are amongst the largest in our industry and are true indicators of scale and merit.

typically **4**
lifttable decks

LOW
AVERAGE
AGE

Another characteristic of our fleet is its low average age. Ships are continuously being added and in recent years EUKOR has rejuvenated and expanded its fleet, ensuring it is ready to meet the changing requirements of the next decade. For example, our new 7,500 CEU post-Panamax vessels are equipped with all the latest features for cargo and crew safety, as well as having greater cargo-handling capabilities. They are designed to work to their full potential with the widening of the Panama Canal in 2016.

A WINNING FORMULA TO MEET YOUR NEEDS

Whilst the greater part of our cargo volume is formed of cars and trucks, our capabilities and expertise stretch far beyond this. In fact, handling cargoes of a complex nature is part of our everyday work. Whether self-driven or break bulk, our ships' access has been carefully designed for cargo to be loaded and unloaded via a ramp. This allows cargo to roll on and off as opposed to the more basic lift-on/lift-off approach. With ships able to accommodate single-unit weights of more than one hundred tonnes, and with door access up to seven metres wide and six metres high, we have the ability to handle a wide variety

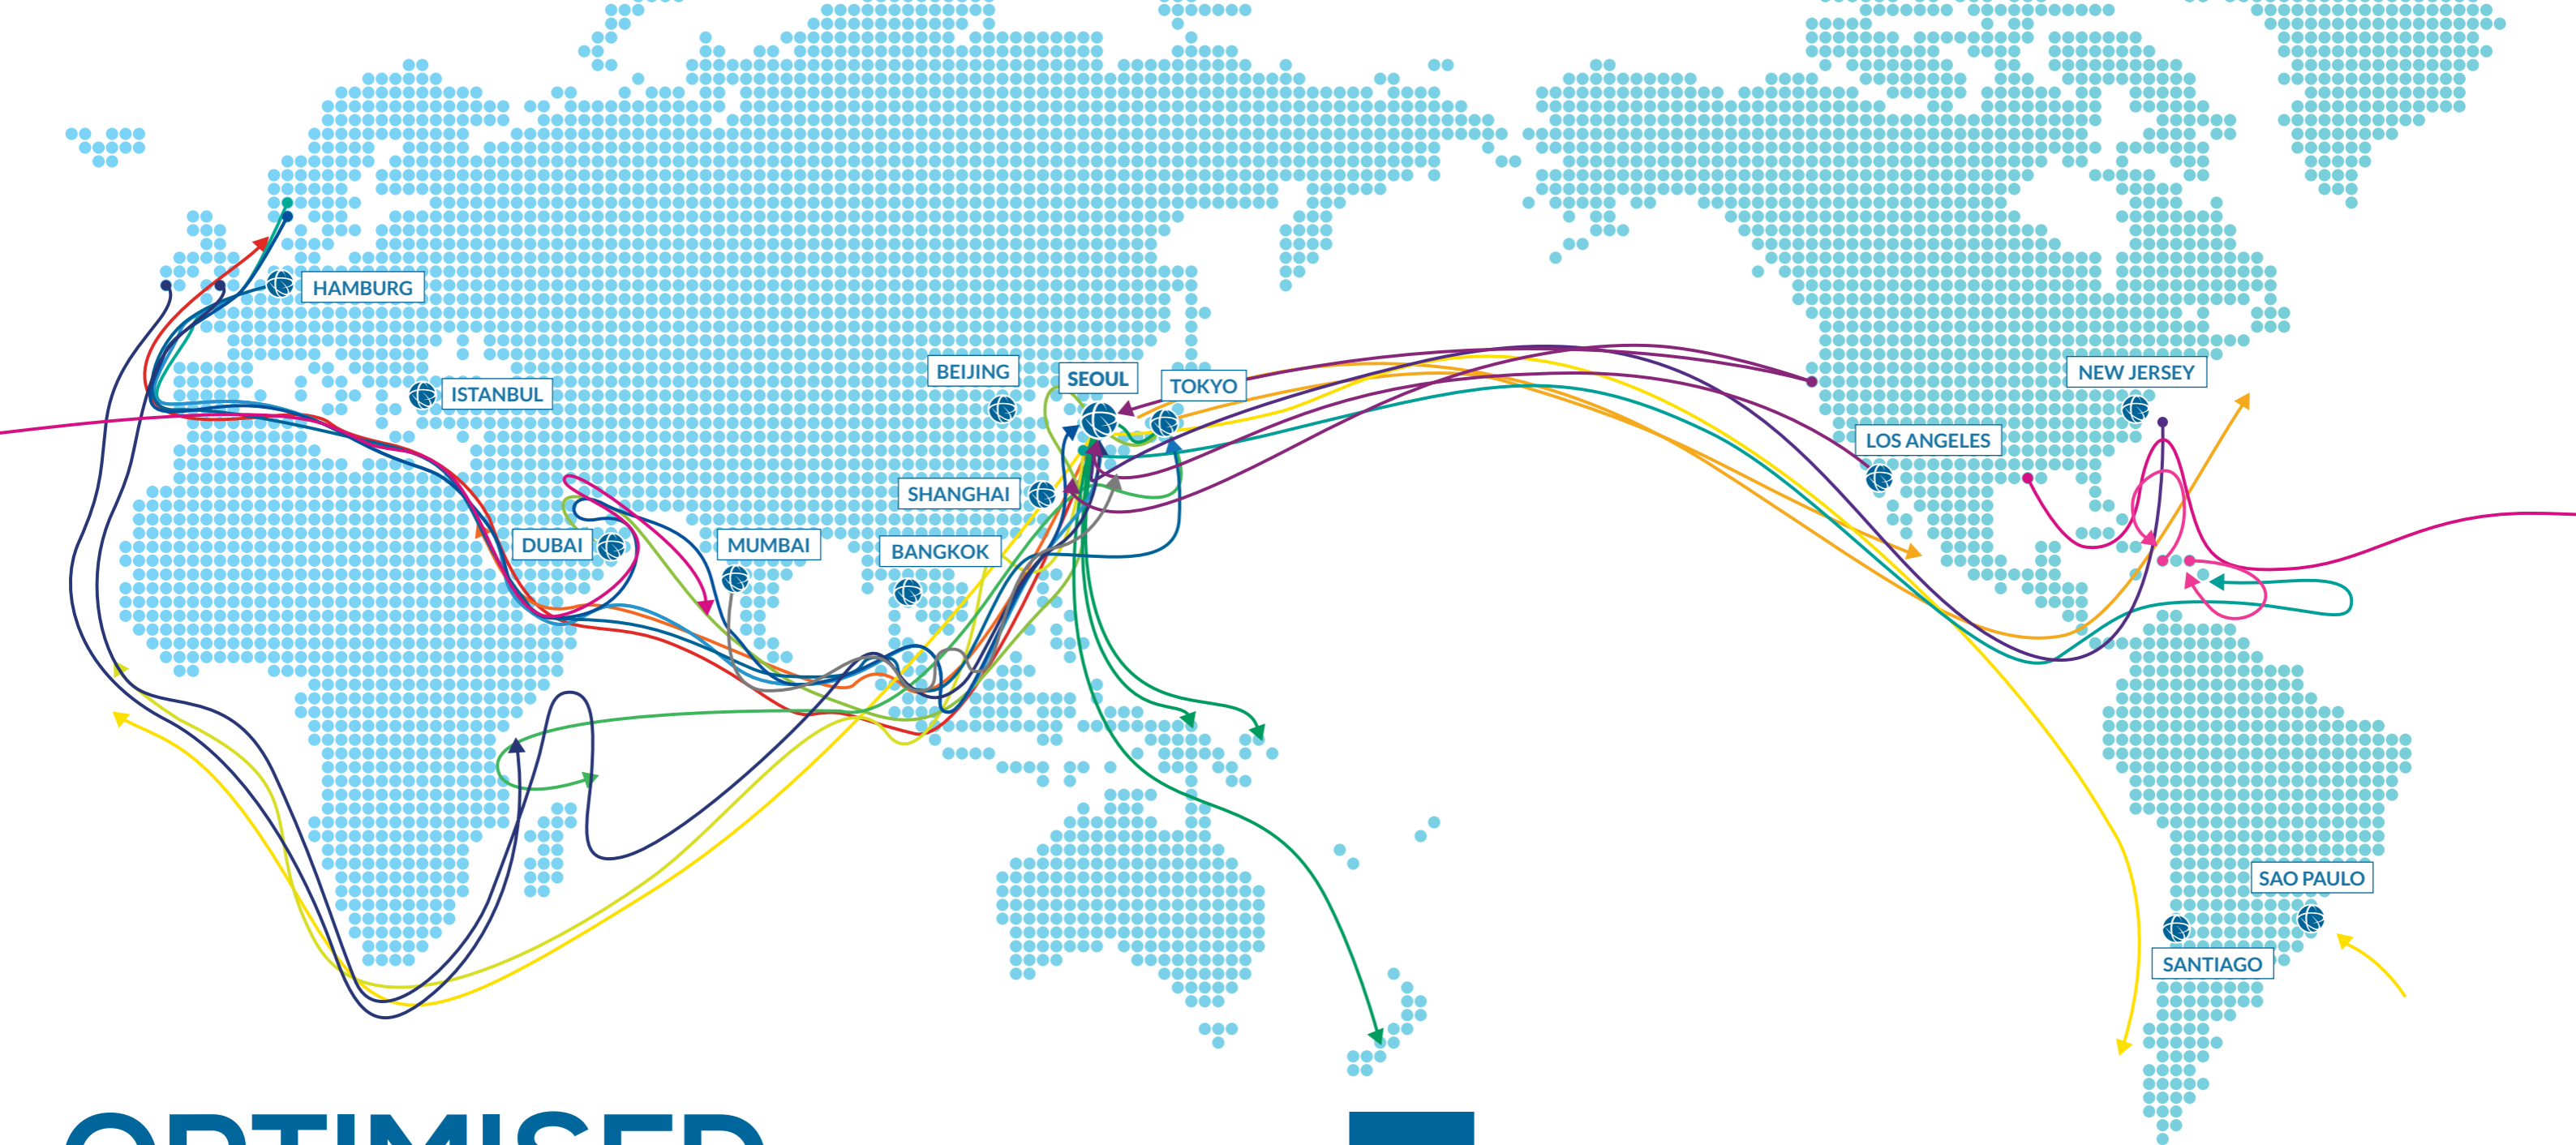

of cargoes – from lighter vehicles, agricultural machinery and construction equipment to steel coils and railcars.

For break-bulk cargo, loading is via purpose-built roll trailers. EUKOR has access to an industry-leading fleet of specialised roll trailers, which are ready to be filled with different types of break bulk. Transferring break bulk – whether steel coils or power generators – from its arrival trailer to a suitable roll trailer requires limited lifting only. From thereon, it's all about moving on wheels: simple, safe and efficient. In all cases, once on the ship, the cargo will be

positioned on a deck suitable for that cargo type before being safely secured with lashing belts or chains.

We thrive on challenges, whether straightforward or complex. However, what really sets us and our partners apart from competitors is EUKOR's desire and ability to find the optimum transportation solution for your cargo. That is when shipping is transformed into a real test of creativity and agility. Couple that with our high-frequency and reliable trade routes and you have a winning formula that meets all your needs.

OPTIMISED GLOBAL ROUTES

Not only do we have a strong foothold in the Asian market but it is also the geographical origin of all our main trade routes, resulting in a network built for efficiency. Flexibility and reliability allow EUKOR to actively adapt its capacity to meet frequency requirements. From here, our carefully planned trade routes will serve most corners of the globe, with transit time and costs as a priority. A network of cross-trade routes links the other most

important markets together, such as North America and Europe to the Middle East, Africa and, of course, Asia.

In recent years, EUKOR's routes between Europe and East Asia have grown hand in hand with requirements from our customers to become the dominant import trade to China – further strengthening EUKOR's foothold in the area. With East Asia and Europe as native tonnage centres,

capacity and cargo synergies with sister company Wallenius Wilhelmsen Logistics come easily – allowing both companies to offer a more complete service offering to their customers.

Whether on its own or via our extended route network, EUKOR is able to offer customers a highly optimised and competitive service product through our worldwide route network.

QUALITY

Trust in our industry is all about safety and quality in all aspects of our service; whether on board our ships, at the port terminal or even on the other side of the desk. It is the outcome of the interaction between machinery, modern technologies and good old-fashioned quality workmanship – and it is right here where EUKOR excels.

We know that we carry our customers' valuable cargo, and we must transport it quickly and efficiently. This requires impeccable cargo handling – a quality that EUKOR and its employees have worked hard to achieve. As no chain is stronger than its weakest link, we continuously work to improve and perfect every aspect of the services we offer.

We take great pride in providing the utmost service quality. A policy of zero-damage tolerance is firmly established throughout the organisation. Together with our skilled workforce, we have proven our ability to provide the safest and most reliable cargo handling in the industry.

“EUKOR focuses intently on internal quality control, process management and systems development so that we can ensure a world-class service.”

EUKOR focuses intently on internal quality control, process management and systems development so that we can continue to ensure a world-class service – no matter where our customers might be located. We continue to adopt the latest information technology and best practices for integration and data interchange, including state-of-the-art web solutions tailored to our customers' needs.

At EUKOR, we are committed to corporate sustainability and take great care in how we operate our business in a social, cultural and economic context. We fully recognise our obligation to our customers, employees and owners and operate our business in an ethical and environmentally sustainable manner.

EUKOR's Quality Management System (QMS) is ISO 9001-compliant, meaning we adhere to policies set up to guarantee quality and sustainability, ensuring compatibility with tomorrow's business climate. EUKOR also became a member of the Maritime Anti-Corruption Network (MACN) in 2014.

“We are committed to corporate sustainability and take great care in how we operate our business in a social, cultural and economic context.”

..& SUSTAINABILITY

Ocean transportation is the most energy-efficient way of moving large volumes of cargo, with fuel consumption per transported unit at a low. EUKOR is compliant with ISO 14001, meaning we adhere to the highest degree of environmental standardisation. EUKOR was one of the start-up members of the Trident Alliance, a coalition of shipping owners and operators who share a common interest in robust enforcement of maritime sulphur regulations and are willing to collaborate to help realise it.

Sustainable business is also linked to local communities in which we live and work. EUKOR believes that social commitments should be met with the spirit of sharing and harmony. Both as a company and as individually responsible citizens, EUKOR and its employees are committed to meeting our social commitments.
